

# Retail Tire, Auto, & Quick Lube Point-Of-Sale

## Simple, Cloud-Based Point-Of-Sale

HITS is a simple, yet robust, cloud-based, enterprise point-of-sale and shop management system used by retail & commercial tire businesses, auto shops, and quick lube centers.

## Customer & Vehicle Management

At the center of managing your customer relationships, HITS centralizes your customer database and helps you easily maintain customer history, vehicle service reminders, future services, and declined services.

## Tires, Auto Service, & Quick Lube

HITS has been an industry-leading tire shop system since the 80's, contains a lightning-fast parts & labor estimator, and has an optional quick lube module. When it comes to complete auto care, the HITS system is well-rounded and efficient at the counter.

## Communications & Digital Inspection

HITS aids communications with your customers, helping ensure important details do not slip through the cracks! Emailing and texting is supported by HITS as well as automated customer notifications and communications. Digital Inspection is available through a third-party integration with AutoTextMe.

## Appointments & Bay Management

Containing both a simple and easy to use Appointment tracker, as well as a robust Bay Management scheduling tool, HITS helps you manage workload and customer expectations. HITS also supports customer appointment notifications & online appointments.

## Inventory & Outside Part Management

Track and audit your inventory with confidence, ease, and accuracy with HITS inventory management. In addition to the stable inventory infrastructure, use the outside part enforcement features and return goods tracking for effective loss control. Drive purchases to payables through the optional Accounting Link integration.

## Payment and Signature Processing

Through a partnership with 1stMile, HITS provides integrated payment processing and digital signature capture, printing, and storage. Reduce payment errors and streamline payments, fleet cards, manufacturer cards, and consumer financing.

## Embedded Accounts Receivable & Commercial Fleets

HITS contains a simple and complete Accounts Receivable (A/R) module that provides real-time consolidated A/R and credit management. In addition to account management, HITS contains fleet management tools to keep your top accounts happy.

## Batch Accounting / ERP Integration

HITS is integrated with the leading accounting systems such as QuickBooks, Sage, Great Plains, Mas90, and more through the Accounting Link integration. The Accounting Link is a batch integration that allows Bookkeeping staff to validate data before importing into the accounting system.
